Press release – “Persone”

7th May 2022

I feel multiple. I am like a room of countless fantastic mirrors which distort into false reflections a single anterior reality that is in no one and is in everyone". That's Fernando Pessoa: Pessoa, which in Portuguese translates as 'person'. People is the title and theme of the exhibition: portraits, appearances, figures. An investigation that also and especially investigates the modes of representation from a rarefied and almost abstract figuration to a false hyperrealism that is actually indifferent to pictorial technique. They are sketched, faceless figures, suffering, indifferent, figures that resurface from a distant memory, known figures, famous figures, figures that deny themselves."Each one of us is more than one, is many, is a prolixity of oneself". It is in this multiplication of self that the mystery of identity is consumed.

The exhibition will remain open to the public from 10 to 31 May
with the following opening times: Tuesday - Saturday 10.00 - 13.00 / 15.00 - 19.00
